## PROFILE

I specialize in building scalable web applications using technologies like Python, JavaScript, and cloud platforms such as AWS. Committed to solving complex problems through innovative solutions, I thrive in collaborative environments where I can mentor junior developers and drive digital transformation.

## WORK EXPERIENCE

### 2024 - PRESENT

Jupiter System Inc. | 226 Kalayaan Ave., Makati City

#### System Analyst

- Analyze business processes and IT systems to identify opportunities for improvement and efficiency.
- Gather and document system requirements by collaborating with stakeholders and end-users.
- Develop detailed system specifications and functional requirements to guide software development and IT implementations.
- Evaluate current IT infrastructure and recommend system enhancements or integration solutions.
- Conduct feasibility studies and risk assessments to support IT project planning and decision-making.

### 2023 - 2024

Studio Showde | 123 Anywhere St., Any City

#### Software Developer

- Design, develop, test, and deploy software applications tailored to meet business needs.
- Write clean, efficient, and maintainable code using industry best practices.
- Collaborate with system analysts and other developers to ensure software solutions adhere to specifications.
- Debug and resolve software issues to enhance performance and usability.
- Participate in code reviews, documentation, and continuous improvement processes to maintain software quality.
